BUILDING STRENGTH & RESILIENCE

Steel is everywhere – in our homes, work places, on farms, roads, bridges, and factories. Everywhere you look, steel is being used to add strength and durability. It is one of the most common materials used around the world, chosen for its versatility, high performance levels and reliability.

Steel & Tube is a proud New Zealand company and a leading provider of steel solutions, from nuts and bolts through to roofing, reinforcing and floor decking.

Every day, we are helping to build strength and resilience in some of the most important infrastructure and construction developments nationally and across many sectors of the economy.

COMMITTED TO QUALITY, SAFETY AND SUSTAINABILITY

QUALITY

Providing quality products that meet and exceed customers' expectations on a consistent basis is key to Steel & Tube's success. Our multi-disciplinary teams are focused on ensuring compliance with our high quality standards. We monitor and assess product to ensure it conforms to regulatory requirements. Internal audits are carried out to enhance Steel & Tube's capabilities, to improve compliance and demonstrate continuous improvement.

ISO 9001:2015 CERTIFICATION

Steel & Tube Holdings will achieve ISO 9001:2015 certification across all business units in 2021. This standard is the best practice quality management framework and demonstrates Steel & Tube's commitment to meeting customer and stakeholders' needs and expectations through quality and continual improvement.

Assessment and certification are carried out by independent experts in quality management systems, and monitoring and continual improvement of quality practices is carried out across all Steel & Tube's operations.

ASSURING QUALITY PRODUCTS

As part of Steel & Tube's strategy to place quality at the fore, Lloyd's Register has been contracted to perform assessments of Steel & Tube's key international and domestic suppliers within Asia Pacific.

STRUCTURAL STEEL DISTRIBUTOR CHARTER

The Structural Steel Distributor Charter is the latest quality assurance initiative led by the structural steel industry. The Charter ensures that structural steels supplied to the local steel construction sector are sourced using best-practice procurement; it represents a mark of excellence for structural steel distributors in New Zealand.

Steel & Tube achieved Steel Construction NZ (SCNZ) charter certification in August 2019.

BIM-spec™ is a one stop portal for all Steel & Tube's specification and technical content. It provides access to a large library of 2D and 3D CAD content and building information models (BIM) across a wide range of Steel & Tube product categories. This includes manufacturer-specific and generic libraries suitable for all specifiers, consulting and fabrication engineers and specialist consultants/contractors.

The BIM-spec portal can be accessed through specifier products on the website: www.steelandtube.co.nz/specifiers

SAFETY

Steel & Tube is focused on ensuring that all Steel & Tube employees perform their shift in a safe and efficient manner and return home safely to their families at the end of the day.

As part of Steel & Tube's relentless drive towards excellence in Quality, Health, Safety, and Environment (HSE), substantial investment has been made to develop, hire and train the best talent to head up the QHSET (Quality, Health, Safety, Environmental & Training) function.

The company has an emphasis on improved HSE performance

and continuously benchmarks against leading international safety standards and best practices.

Ensuring a safe working environment is key to this. A national machinery safeguarding assessment and optimisation programme has been completed, using AS/NZS 4024 as a benchmark for compliance along with relevant machine specific standards and WorkSafe best practice guidelines.

In addition, Steel & Tube is developing a robust preventative maintenance programme to minimise asset failure and

breakdowns, reduce downtime, improve safety, prolong the life of its assets and improve production for customers.

Steel & Tube has a 'zero tolerance' approach to safety breaches, and investigates all incidents using a 'dig deeper' investigation process with oversight from the CEO. This allows key individuals to take accountability for the incident / accident and responsibility for effectively managing the remedial actions.

CREATING A SUSTAINABLE BUSINESS

PUTTING THE CUSTOMER AT THE HEART OF OUR BUSINESS

- › TALENT ATTRACTION & RETENTION
- › PEOPLE DEVELOPMENT & LABOUR PRACTICES
- › CULTURE OF WELLBEING

SUPPORTING A WINNING TEAM

- › PRODUCT LIFE CYCLE PERFORMANCE
- › CUSTOMER SATISFACTION

COMMITMENT TO SAFETY & QUALITY

- › OCCUPATIONAL SAFETY & HEALTH
- › HIGH QUALITY PRODUCTS & SERVICES

OPERATIONAL AND SUPPLY CHAIN EXCELLENCE

- › FINANCIAL PERFORMANCE & CORPORATE GOVERNANCE
- › MATERIAL EFFICIENCY & RECYCLING
- › ENERGY & CARBON

AS A PROUD NEW ZEALAND BUSINESS, WE ARE COMMITTED TO BUILDING A SUSTAINABLE COMPANY THAT CREATES LONG TERM VALUE FOR OUR CUSTOMERS, EMPLOYEES, SHAREHOLDERS & COMMUNITIES.

For Steel & Tube, this means considering our commitment to our people and communities, our environmental footprint, and managing our business ethically and in line with best practice governance.

We have identified 10 areas which we believe are fundamental to ensuring a sustainable future for our

company, and we have aligned these with our strategic pillars.

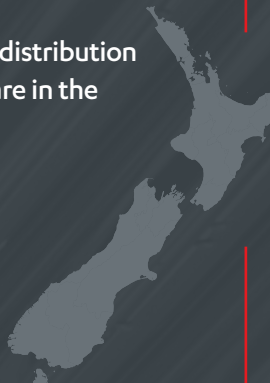

Steel & Tube is now at the start of its journey towards becoming a more sustainable organisation. Going forward, we will be driving change by developing initiatives, targets and metrics to help us achieve our goals.

NATIONWIDE STEEL SOLUTIONS

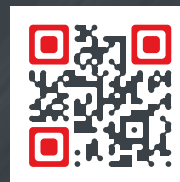

Steel & Tube offers a comprehensive range of steel and allied products through a nationwide product distribution and processing network, so no matter where you are in the country we can deliver product to you.

As experts in our field, we pride ourselves in being able to offer a consistent end-to-end customer experience, advising, sourcing and supplying customers with their steel requirements. And underlying everything we do, is our continued commitment to quality.
